SUMMARY

B.Tech graduate in Information Technology with experience as a Data Science Intern at CBRE in Sales Management, Gurugram. Skilled in MERN Stack development (MongoDB, Express.js, React.js, Node.js) and passionate about AI, Machine Learning, Large Language Models (LLMs), and software development. A quick learner with problem-solving and analytical skills, committed to building innovative, technology & data-driven solutions.

EDUCATION

Bhagwan Parshuram Institute of Technology, I.P. University	Delhi
B.Tech, Information Technology — CGPA 7.78 (74%)	2026
CBSE — 12th Grade, 87%	2022
CBSE — 10th Grade, 87%	2020

EXPERIENCE

CBRE <i>Data Science Intern</i>	Gurugram, India <i>Since Feb 2026 (Ongoing)</i>
- Designed and built an end-to-end extraction pipeline, scraping and extracting RERA data for Maharashtra, Gujarat, Delhi, and West Bengal (Feb – Jul 2026). - Built a React-based fuzzy lookup tool that matches abbreviated/inconsistent text entries to their full forms using fuzzy string matching logic (Feb – Jul 2026). - Automated a Google News scraper with Selenium that reads company names from Excel and searches for growth-related keywords (e.g. Growing, Hiring, Expanding), paired with an interactive frontend.	
Culture Holidays Pvt Ltd <i>Quality Analyst Intern</i>	Gurugram, India <i>Jul – Sept 2025</i>
- Tested core issues(login, payment-gateway) on the main website, takeyourbreak.com and reported to the manager. - Suggested what can be done to make better. - Made email-templates and tested using postman.	
Coding Nijas <i>C++ Certification Program</i>	Delhi, India <i>Jan – Jun 2025</i>
Airports Authority of India <i>Cisco Packet Tracer Training</i>	Delhi, India <i>Dec 2023</i>

PROJECTS

India RERA Data Extraction (CBRE) <i>Python (Pandas, NumPy, Openpyxl, Tqdm, EasyOCR, Selenium)</i>	<i>Feb – Jul 2026</i>
Designed and built the extraction pipeline myself, scraping and extracting RERA data for Maharashtra, Gujarat, Delhi, and West Bengal using the tool.	
Google News Scraper (CBRE) <i>TypeScript, Python, Selenium</i>	
Uses Selenium automation to read company names from Excel, then searches Google News for each company alongside growth keywords (Growing, Hiring, Expanding, etc.), with an interactive frontend for the project.	
AI-Powered iPad Calculator <i>Tailwind, Python, Next.js, Git, TypeScript</i>	<i>2 months</i>
Developed a Next.js/Tailwind frontend connected to a Python backend to power AI-based Gemini LLM calculations.	
Jarvis Assistant <i>Python, Git, React</i>	<i>1 week</i>
Built a Python-based voice assistant with a React front-end interface for user interaction.	

SKILLS & CERTIFICATIONS

Technical Skills: C++, Python, JavaScript, TypeScript, Full Stack Development, Data Structures & Algorithms, Database Management, React, Node.js, MongoDB, SQL, Git, GitHub, Data Extraction, LangChain, Vercel/Render

Certifications:

- Software Engineering Fundamentals — Electronics & ICT Academy, IIT Guwahati
- Certification Course in Python (Google)
- MongoDB 3 and Rapidly Develop Scalable Applications (Udemy)
- Programming with JavaScript (META)
- Bootstrap, Great Learning
- React JS Fundamentals, Great Learning
- Global AI Training — Leveraging AI at CBRE (Level 1)
